Tiger Claw Offers Free Installation Gun and Hidden Deck Fastener Package to NADRA Builder Members

BRISTOL, Connecticut — August 10, 2010 — Tiger Claw today announced a new benefit to NADRA builder members. Tiger Claw will be giving away its popular Tiger Claw pneumatic installation gun and TC-G (TC-150) fasteners to builders of the North American Deck and Railing Association (NADRA). The promotional package includes enough TC-G (TC-150) hidden deck fasteners to cover 50 square feet of deck surface, a TC-G (TC-150) Slot Cutter, two strips of collated pneumatic screws and a Tiger Claw T-shirt.

To qualify, builders must be a current NADRA member and must complete an application on the [NADRA website](#).

“As a long-time member, we want to share our hidden deck fastener installation package with others in the NADRA community,” said David Hartmann, president of Tiger Claw. “Many have already embraced Tiger Claw’s pneumatic installation gun and the TC-G (TC-150) fastener for pre-grooved deck boards, but some have yet to be introduced to this time- and money-saving combination. This is a great opportunity for members to try the package at no cost.”

The Tiger Claw pneumatic installation gun dramatically reduces the already-quick installation of Tiger Claw's groove fasteners. Decking professionals, as well as do-it-yourselfers, can build a beautiful, nail-free surface deck *four times faster* than they can through traditional surface screwing. The fastener installation gun drives a collated pneumatic screw in like a nail, but can be removed like a screw. The installation gun is used with Tiger Claw's TC-G (TC-150) hidden deck fastener for pre-grooved boards.

If you are not yet a member of NADRA, join today to receive your free Tiger Claw package. Call NADRA at: (888) 623-7248 to expedite the membership process.

NADRA members without access to the online application may contact Anne Timko, at Tiger Claw, (860) 940-6266 or annet@deckfastener.com.

About NADRA

NADRA is made up of deck builders, manufacturers, dealers/distributors, wholesalers, retailers, and service providers to the deck and railing industry. NADRA serves as a trade association with emphasis on safe building practices and deck safety. For more information about NADRA, visit www.NADRA.org.

About Tiger Claw Hidden Deck Fasteners

Tiger Claw offers a complete line of innovative and versatile hidden deck fasteners. The TC-1 is a coated steel hidden deck fastener and the TC-2 deck fastener is made of stainless steel. Both are ideal for pressure-treated lumber, including Cedar, Redwood, and Pine. The TC-3 is used with composite decking materials, Cellular PVC, and medium density hardwoods. The TC-4 is perfect for 3½" wide exotic hardwood decking lumber like Ipe and Teak. The Proclip is recommended for AZEK decking. The TC-G (TC-150) offers the fastest installation available today for 1" or thicker pre-grooved decking or non-grooved boards using the TC-G (TC-150) slot cutter. The TC-120 works just like the TC-G (TC-150) and is ideal for ¾" grooved decking; TC-120 slot cutter is available for

non-grooved boards. To increase the already quick installation time of the TC-G (TC-150), Tiger Claw has introduced an installation gun compatible with the TC-G (TC-150), TimberTech CONCEALoc, and Trex Hideaway hidden fasteners. Tiger Claw also offers High Performance Deck Screws, available in four different colors.

About Tiger Claw Inc.

Tiger Claw Inc. was incorporated in 2001 and currently offers several of its own hidden deck fasteners, as well as private label products including CONCEALoc by TimberTech, EG 1-2-3 by EverGrain, and the Hideaway by Trex. Its products are designed to greatly increase the value of construction projects without significantly increasing overall project costs. Tiger Claw is headquartered in Bristol, Connecticut. For more information, visit www.deckfastener.com or call (800) 928-4437. ###
