February 12, 2009

To our valued customers:

As many of you know, Viance recently issued a press release reporting isolated failures of wood treated with micronized copper quaternary (MCQ) preservative. We wish to remind you that Arch Treatment Technologies, Inc. does not sell MCQ. Our Wolman® E  $\mu$ CA-C preservative is a proprietary formulation that incorporates a patented combination of propiconazole and tebuconazole. This unique preservative product provides superior protection against rot, fungal decay, and termite attack.

We have utmost confidence in the performance of our Wolman® E  $\mu$ CA-C wood preservative. Based on an independent review of substantial technical data, ICC-ES issued evaluation report ESR 1721 recognizing that wood treated with Wolman® E  $\mu$ CA-C wood preservative can be used in above ground, ground contact, and freshwater applications. As a symbol of our confidence in this product, we back the Wolmanized® Residential Outdoor® brand of treated wood with a lifetime limited warranty, which can be found at [www.wolmanizedwood.com](http://www.wolmanizedwood.com). Wolmanized® Residential Outdoor® brand of treated wood is also backed by the Good Housekeeping Seal.

The Wolmanized® brand has been associated with reliable preserved lumber for more than 75 years. We want our licensees and their customers to know that Wolman® E  $\mu$ CA-C wood preservative will perform as we have promised. If you have any questions regarding our wood preservative products, please feel free to contact Steve Snyder at (770) 805-3266.

Sincerely,

A handwritten signature in blue ink that reads "Steve Wisniewski". The signature is written in a cursive style with a blue ink color.

Steven R. Wisniewski
